Testing & Tools: Automated Testing, BDD, Git, Jira, ChatGPT, OpenCode, Claude Code, Cursor

PROFESSIONAL EXPERIENCE

Johnfoord

Azure Application Developer | January 2025 - Present

- Developed tools to extract and display Trading Economics data, including Consumer Price Index (CPI) and Producer Price Index (PPI) data.
- Built integrations between Microsoft Dynamics 365 CRM and SharePoint Lists using internal APIs.
- Created an internal application to make CRM and SharePoint data easier to access and modify.
- Built a simple interface for viewing extracted economic data, designed to be embedded in SharePoint as an iframe.
- Added Azure MSAL authentication for secure Microsoft account login.
- Built the John Foord Customer Portal from the ground up, including authentication, Microsoft Dynamics 365 CRM integration, CRM data synchronization, scheduled cron jobs, and Google Maps integration for location pinpointing: cp.johnfoord.com.

Selectstart.gg

Freelance FullStack Developer

- Worked on SelectStart, a gaming/e-sports related website: selectstart.gg.

QADWorks

Full Stack Developer | March 2022 - January 2025

- Built responsive, API-connected frontend features for Odfjell and Quantem vessel cargo operations, supporting cargo activity tracking, terminal workflows, and logistics documentation from business requirements and design specifications.
- Worked with designers and backend developers to connect user interfaces with APIs and databases.
- Developed and launched Shopify and WordPress projects, including e-commerce features and client websites.
- Supported multiple client projects as an additional development resource, helping reduce team workload and keep project deliverables on schedule.

Projects:

- **Breeze:** Frontend development and API integration for a student engagement platform used for extracurricular tracking, event management, attendance, and soft skills development: breeze.school.
- **Quantem SOF and Odfjell SOF:** Frontend work and API integration for Statement of Facts systems used to digitize vessel cargo terminal operations and documentation.
- **Odfjell Customer Portal:** Built frontend features and integrated APIs for a customer-facing web app that lets customers monitor stock levels, track product movements, manage orders, view shipments, and see throughput analytics.
- **Banter App:** Real-time chat application; built backend features using MQTT and SignalR.
- **Inevitably Homegrown:** Shopify e-commerce website development and setup: inevitablyhomegrown.com.
- **Doventry:** WordPress website development: doventry.com.

MindNation

Front-End Developer | 2023 - 2025 | Freelance

- Added new features, improved existing screens, and fixed UI/application bugs in the MindNation web application.

- Integrated Agora web conferencing for real-time virtual sessions.
- Built a micro-breaks notification feature to remind users to take scheduled health breaks.
- Created dashboards, charts, landing pages, and other interactive UI components.
- Developed a WordPress website using Elementor for Monique Ong: moniqueong.com.

Project:

- **MindNation Web Application:** Added features, integrated Agora web conferencing, built micro-break reminders, and created dashboard and chart components.
- **Monique Ong Website:** Developed a WordPress website using Elementor.

Coursebank.ph

Front-End Developer | February 2023 - October 2024 | Freelance

- Developed a pixel-perfect Coursebank theme from mockup designs.
- Applied and customized the Coursebank theme for the Open edX platform.
- Worked with designers and developers to apply the UI consistently across the learning platform.

Duke Software Development Center

Software Engineer II | January 2020 - March 2022

- Worked on Duke Connected Equipment Platform, a web dashboard used to monitor equipment data collected from IoT devices.
- Built dashboard screens that helped users view equipment status, readings, and related device information.
- Connected frontend screens with backend services and REST APIs to display device data on the web application.
- Wrote automated tests using BDD practices.
- Worked in an Agile development environment with regular sprint planning, task updates, and team collaboration.

KKK Turbo

Full Stack Developer | November 2019 - February 2020 | Freelance

- Worked with the business owner, end users, and management to gather requirements and define system workflows.
- Developed a custom ticketing system for tracking and managing operational requests.
- Developed inventory management features for stock tracking and business records.

Project:

- **Ticketing and Inventory Management Systems:** Developed custom systems for ticket tracking, inventory records, and internal business processes.

The Marketing Group

Full Stack Developer | August 2017 - January 2020

- Built responsive websites from design requirements and client specifications.
- Developed custom WordPress themes, including page templates, reusable sections, and frontend styling.
- Created HTML email templates for marketing and client communication needs.
- Handled website updates, bug fixes, content changes, and client-requested enhancements.

Ecell Global

Software Engineer | September 2017 - August 2018

- Developed tools to automate manual processes.
- Customized Shopify themes based on brand and store requirements.
- Added and improved e-commerce features for online stores.

JDEV I.T Business Solutions

Junior Programmer | July 2016 - September 2017

- Developed web applications based on client requirements.
- Built HRIS modules for employee and admin workflows.
- Developed payroll system features for salary processing and business operations.

Project:

- **HRIS and Payroll System:** Developed HR and payroll modules tailored to client business requirements.

EDUCATION

Bachelor of Science in Information Technology

Tarlac State University | 2012 - 2016
